

ALL-NEW HD BIKE CAMERA + FRONT LIGHT

THE DASHCAM ENGINEERED FOR CYCLISTS

SAFER. SMARTER. SHARPER. SMALLER.

Cycliq's new Fly12 CE integrated front-facing bike camera and safety light has been re-engineered to give cyclists super-sharp video recording, a more powerful light and impressive battery life. It's also smaller and lighter than ever - and packed with new features including our unique quick-release mounting.

The new features will appeal to a wide range of cycling markets - competitive cyclists, commuters, mountain bikers and those who simply ride for fun - and the new mounting solution means the cameras will fit a range of bike types.

- FULL 1080p HD CAMERA + AUDIO
- BRIGHT 600-LUMEN FRONT SAFETY LIGHT
- MASSIVE 8 HR RUN TIME
- SMART LOOPING VIDEO
- INTEGRATED BIKE ALARM
- BLACK BOX INCIDENT PROTECTION
- ALL-NEW 1/8 QUICK-RELEASE MOUNTING
- STRAVA INTEGRATION
- 6-AXIS IMAGE STABILISATION
- SMARTPHONE APP CONNECTIVITY
- CONTROL VIA ANT+
- WATERPROOF TO 1M
- WEATHER AND DUST PROOF
- HOME-SAFE MODE
- USB-C FAST CHARGE
- SIMPLE TWO-BUTTON OPERATION

FLY12^{CE122}

HD BIKE CAMERA + FRONT LIGHT
THE SAFETY DASHCAM FOR CYCLISTS

Smart technology that's simple to use.

There's a lot of technology packed into the new Fly12 CE, but it's all controlled by just two buttons. While the Fly12 CE keeps its eyes and ears on the road, cyclists can relax and enjoy the ride.

CAMERA

Full HD camera with audio.

Shoot super-sharp video at up to 60 frames per second in 1920 x 1080p resolution with audio. The ultra-wide 135° viewing angle and

6-axis image stabilisation and video resolution option with High Dynamic Range (HDR) captures action footage, number plates and incidents with amazing clarity.

LIGHT

Super-bright front light.

The 600-lumen light cuts through the darkest night and is highly visible during the day. Choose from three light modes and three dimming options, or it can operate with camera only.

BATTERY

Massive battery power.

With up to 8 hours operating time, our industry-leading battery will last longer than most rides. A full recharge only takes 2.5 hours.

SAFETY + SECURITY

Be safe. Be secure.

Smart video looping means never running out of storage space on the microSD card. And if the Fly12 CE detects the rider has been involved in an incident, it automatically locks and preserves the footage.

The in-built alarm alerts the rider's smartphone - via the CyliqPlus app - the moment their bike is moved. For extra security, the light flashes and the camera captures everything on video.

When the battery runs low, we still get cyclists home safely. The camera automatically turns off giving the light enough battery power for another 30 minutes.

MOUNTING + ACCESSORIES

Quick and easy.

The new Fly12 CE can be mounted either above or below the handlebars and the new quick-release system lets cyclists attach or remove the Fly12 CE with a simple 1/8th of a turn. Our accessory range now includes multiple mounting solutions for all cyclists and includes the Cyliq Duo Mount which also holds a bike computer.

1/8 TURN
QUICK-RELEASE MOUNT

POCKET SIZE

Small, sleek and tough.

The pocket-sized Fly12 CE weighs in at just 195g (5.5 oz) but don't let its size fool you. We've

built it tough to withstand knocks, and the nanotechnology weather and dust protection makes it suitable for use in all conditions.

CONNECTIVITY

Ride. Record. Edit. Share.

Fly12 CE connects via ANT+ to compatible Garmin bike computers to remotely control the camera and lights.

The camera connects with the CycliqPlus mobile app through Bluetooth; and to Mac or PC computers with USB. The free CycliqPlus Desktop software lets cyclists edit footage for social sharing and with Strava integration you can overlay metrics—like heart rate and cadence—over the footage of the ride.
